Purpose of Application:

The subject property is zoned Limited Service Residential (LSR) as illustrated on Schedule B9 to By-law No. 10-1996, as amended.

The Owners wish to demolish the existing one-story detached recreational dwelling with a gross floor area of approximately 271.88 m² and construct a new, two-storey detached recreational dwelling with a gross floor area of approximately 439.25 m². The new recreational dwelling is proposed to be located generally within the footprint of the foundation of the existing dwelling and will not be located any closer to the water than currently exists. The existing dwelling is non-complying with a water yard setback of 11.10 m and the new construction is proposed to be setback 11.38 m. Given the substantial demolition, increase in height and change in shape, size and floor area, the proposed construction will no longer enjoy non-complying status and requires relief from the By-law to recognize a reduced water yard setback.

The purpose of the minor variance is to permit a reduction of the 30 m water yard setback for the proposed new construction, recognizing the existing deficient water yard with the closest point being setback 11.10 m and no further encroachment being made, as shown on the site plan prepared by Sandra Gava, Architect, dated June 7, 2023.

The proposed development also includes the demolition of an existing non-conforming bunkie (frame cabin). The existing boat house and dock are proposed to remain and do not form part of the relief requested through this Minor Variance application.
